Sulphonation Technology in the Detergent Industry

reaction engineering aspects derived from the sulphonation technology processing chemistry. Product quality, product storage and handling, product safety and physical properties are the contents of the next section. The effluent handling and exhaust gas treatment of the SO₂ sulphonation technology are further discussed in detail.

Sulphonation Technology in the Detergent Industry

The sulphonation reactor technology and neutralisation equipment differ significantly between the four suppliers and therefore they will be discussed separately. Exhaust gas cleaning and effluent treatment are sufficiently similar to be described in general terms with specific remarks where significant differences between the four suppliers occur.
